**TO WHOM IT MAY CONCERN**

**Subject: Subject: Proposal to allocate land for the construction of a modular crude oil refinery**

Following the various meetings held in recent days, we hereby request the identification of suitable land for the installation of our Refinery, Bitumen Production and Desulfurization Plant.

Based on previous site visits, we confirm that the land located in the Mangapwani area (see attached map) has the right characteristics to accommodate the plant's equipment. In fact, it is on the terminal part of the area whose industrial destination provides for the possibility of creating structures at sea for loading and unloading both materials to be processed and finished ones. the terminal border to the East would allow us to potentially expand the area, should this be necessary, due to the expansion of production activity.

We look forward to receiving your approval to proceed.

Best Regards
